Europe and Caucasus

Armenia

Yerevan Airport

Equipment:	Complete CAT III system
Airport / Project description:	A complete CAT III Idman lighting system, including remote control, was delivered to Yerevan Airport in 2003. The next year there was an extension for taxiways. Another extension for PAPIs is going on in 2009.

Bulgaria

Sofia Airport

Equipment:	Complete CAT II/III system
Airport / Project description:	The lighting project at Sofia Airport in 2005 was carried out by Idman and Safegate - partners at the time, colleagues since 1 January 2009. To this significant project Idman supplied the light fittings as well as the CCRs, and Safegate delivered an ASP (Airfield Smart Power) / SafeControl system.

Estonia

Tallinn Airport

Equipment:	Complete CAT II system
Airport / Project description:	Tallinn Airport - a good partner and a neighbour to Idman, Finland - has already been operating with two generations of Idman lights. Their remote control system is also from Idman.

Finland

Helsinki-Vantaa Airport

Equipment:	Complete CAT II systems
Airport / Project description:	Helsinki-Vantaa is the home airport for Idman. The airport of the capital of Finland and Idman premises are situated only 8 kilometres away from each other, and the co-operation between the two is just as close. One significant date for Helsinki-Vantaa was the 28th of November 2002, when they opened their third runway - equipped with Idman products.

Germany

Lübeck Airport

Equipment:	CAT III lighting
Airport / Project description:	During the summer of 2005 Idman delivered the airfield lighting equipment for a CAT III runway to the airport of the beautiful city of Lübeck in Germany.

Poland

Krakow Airport

Equipment:	Complete CAT II system
Airport / Project description:	Idman shares a long history with the Polish airports. Thanks to the good partnership, 16 Polish airports have been equipped with Idman products. Krakow Balice Airport has an upgradable control system and 2 monitoring stations. Idman equipment has already been working there since 1995 without problems. In 2007 the remote control system was changed to a new, more modern one. By the end of 2009 there will be an upgrade for PAPIs, signs and the lay-out.

Romania

Timisoara Airport

Equipment:	Complete CAT II system
Airport / Project description:	The excellent co-operation between Timisoara Airport and Idman started already in 1978. After all these decades, three generations of Idman light fittings and CCRs have been in use at Timisoara airport.

Spain

Barcelona Airport

Equipment:	CAT III lighting
Airport / Project description:	Barcelona airport has been expanding tremendously at the beginning of the 21st century. Idman has supplied the lighting for three CAT III runways as well as for a great number of taxiways. This means altogether 10 000 light fittings.

Asia

China

Beijing Airport

Equipment:	CCRs, runway lights
Airport / Project description:	After more than 20 years of successful co-operation, Idman products are in use at over 20 airports in China. The latest deliveries have consisted of IDM 8000 constant current regulators and inset runway lights for the runway 3 at Beijing Capital International Airport.

Kazakstan

Aktobe Airport

Equipment:	Complete CAT II system
Airport / Project description:	Idman has equipped a number of airports in Kazakstan. One of them is the airport of Aktobe in the Western part of the country. The lighting system delivered by Idman in 2005 also includes a remote control system.

India

Hyderabad Airport

Equipment:	Runway and taxiway lights, CCRs, remote control system
Airport / Project description:	A project for a new airport to Hyderabad in Southern India started in 2006. In addition to the CCRs and an IDM 7600 remote control system Idman supplied 3000 light fittings for the runways and the taxiways. The project has continued with two extension phases which include the Safegate ASP system.

Russia

Sochi Airport

Equipment:	Complete CAT I system
Airport / Project description:	The city of Sochi on the coast of the Black Sea will have enormous building projects before hosting the Olympic games in 2014. Idman airfield lighting deliveries started already in 2007 - seven years before the games - and are still going on.

Africa

Morocco

Casablanca Airport

Equipment:	Complete CAT II system
Airport / Project description:	The famous city of Casablanca by the Atlantic Ocean also has an Idman airfield lighting system. The project included the equipment for one runway and a parallel taxiway with a number of exits. CCRs were also delivered by Idman.
